What is a battery cabinet?

A battery cabinet houses and protects the batteries that supply stored energy to a UPS system. It ensures that backup power is readily available whenever primary power is interrupted. Battery cabinets can be installed indoors or outdoors and are designed to provide secure, organized, and scalable energy storage for continuous power delivery.

How many batteries can a 1085 cabinet hold?

This welded cabinet offers flexibility in adding runtime with a small footprint addition to the overall system. The 1085 model cabinets can support Eaton, CSB, Enersys, North-star, and Yuasa batteries from 280 watts/cell up to 620 watts/cell. Each cabinet can take 40 battery jars, includes pull out trays with 48V quick disconnects in each tray.

Who makes battery cabinets?

Global Power Supply offers battery cabinets from industry-leading manufacturers such as Toshiba and Narada, available in multiple configurations to match your specific operational needs. Because every facility's power requirements are unique, we can help tailor the number of cabinets, capacity, and layout to meet your space and runtime objectives.
