A 400 means that the request was malformed. In other words, the data stream sent by the client to the server didn't follow the rules. In the case of a REST API with a JSON ...

Apart from the obvious additions, the only thing I had to do to prevent code 400 errors was to include the word JSON somewhere within messages. This is necessary when ...

What the difference between the 400 and 404 HTTP errors? Can you show me an example for understand the difference? Thank you.

I'm trying to access an API using Postman to get a response using basic authentication, but when I submit the data, it gives me the dreaded 400 error, which apparently indicates that some ...

spring rest Handling empty request body (400 Bad Request) Asked 9 years ago Modified 1 year, 8 months ago Viewed 96k times

App Engine : 400 - Your client has issued a malformed or illegal request Asked 15 years, 5 months ago Modified 6 months ago Viewed 81k times

I wish nginx was saying something other than 400 in this scenario, as nginx -t didn't complain at all. P.S. this happened while migrating from older nginx 1.10 to the newer 1.19.

The 400 (Bad Request) status code indicates that the server cannot or will not process the request because the received syntax is invalid, nonsensical, or exceeds some ...
