What is a 40000 mAh power bank?

The 40000mAh power bank is a high capacity portable charger that is designed to provide multiple charges for your devices. With a capacity of 40000mAh, this power bank can charge your smartphone, tablet, or laptop multiple times before needing to be recharged itself.

How long does a 40000 mAh battery take to charge?

The 40000mAh power bank takes approximately 16 hours to fully recharge itself when using an 18W wall charger (not included). This allows for convenient and efficient charging of the power bank before it can be used to charge other devices.

3. How much charge is 40000mAh?

How long does a 40000 mAh power bank last?

A 40000mAh power bank has a high capacity and can last for various durations depending on the device being charged. For example, it can run a 5V USB lamp for over 30 hours, charge a smartphone battery up to 15 times, charge a tablet or iPad up to 6 times, and charge a laptop battery 2 to 4 times.

Can a 40000mAh power bank charge a laptop?

Yes, a 40000mAh power bank can charge a laptop. With a 65W USB-C port, it can provide enough power to charge a laptop at full speed. For example, it can fully charge a 15" MacBook Pro in just 1.8 hours. It is a convenient option for business trips or when you are on the go.
