Reliable, High-efficiency and SYP48-6000 is an intelligent power module supply specially designed for 4G and 5G micro base stations. Its small size, light weight, high reliability, high ...

Hytera IBS3900 is designed as one-box micro-cell eNB for low density but large coverage scenarios, and is aimed to provide remote/sub-urban network supplement, outdoor ...

The Switch Mode Power Supply is highly integrated outdoor 5G micro base station power supply system, it combines AC input power distribution, ...

Our integrated circuits and reference designs help you create small cell base stations that enable multiband operation, higher bandwidth and better system reliability.

With over 3,000 charge cycles, this compact power solution is engineered for long-term value and field durability. Compatible with micro cell base ...

With over 3,000 charge cycles, this compact power solution is engineered for long-term value and field durability. Compatible with micro cell base stations, this lithium battery supports the ...

Power supplies can be employed in each of the three systems that compose wireless base stations. These three systems are known as the environmental monitoring system, the data ...

Hytera IBS3900 is designed as one-box micro-cell eNB for low density but large coverage scenarios, and is aimed to provide remote/sub-urban ...
