A team of researchers from the Massachusetts Institute of Technology (MIT) and the University of Nairobi are designing affordable off-grid cold storage units for perishable crops in Kenya, using ...

The BESS project has been identified as a possible solution to increased proportion of intermittent energy to the Kenyan power system and energy curtailment during off peak hours. The BESS ...

The programme will deploy decentralized, often mobile, off-grid solar-powered cold storage (SPCS) units, strategically placed near farming clusters and aggregation points.

Solar container for agriculture delivers clean, reliable power to farms, cutting costs and supporting sustainable farming in remote areas.

Portable solar powered cold store is an innovative new solution we aptly named "Solar Freeze", which enables smallholder farmers to store temperature sensitive fresh agricultural produce.

With the right mix of policy, innovation, and investment, it can become a continental leader in energy storage too. BESS can not only stabilise the grid but also ...

In Kenya, an increasing number of households, industrial and commercial enterprises are adopting solar or backup power solutions. With its factory-direct pricing, high efficiency, long ...

The mobile solar containers and portable solar chargers are designed with easily foldable solar panels which makes them ideal for remote areas and versatile applications like mining, ...
