Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

How does tariff risk affect a battery energy storage system (BESS) project?

Mitigating tariff risk in battery energy storage system (BESS) projects is crucial for ensuring project financial viability, as tariff changes can significantly affect cost structures and overall project economics.

Will US tariffs affect energy storage?

There have also been indications that the US administration may consider other tariff proposals impacting energy storage, such as a 10-20% universal tariff, tariffs of up to 60% across the board on Chinese-origin goods, and tariffs of 25% on Mexican and Canadian origin goods.

Will China impose tariffs on lithium-ion EV batteries?

An interesting issue will be the imposition of tariffs. There are existing tariffs pursuant to Section 301 of the Trade Act of 1974 on some Chinese-origin lithium-ion EV batteries and non-lithium-ion battery parts, which were increased to 25% in September 2024.

When exporting energy storage systems (ESS) and lithium batteries, Harmonized System (HS) codes play a decisive role in determining import tariffs, customs clearance ...

The Harmonized Tariff Schedule of the United States (HTS) sets out the tariff rates and statistical categories for all merchandise imported into the United States.

Apr 23, 2025 · China's energy-storage industry is facing challenges in 2025 due to the escalating US-China trade war and tariffs affecting exports to the US, its largest market.

Depending on the severity of potential tariff increases, the cost of utility-scale BESS could rise between 12% and 50% across three tariff scenarios modelled by Wood Mackenzie ...

As this previously imported solar module inventory is depleted and suppliers fully incorporate the new tariffs into pricing, we're ...
