How is electricity generated in Armenia?

Armenia has sufficient electricity-generating capacity to meet current domestic needs, but electricity demand is projected to grow by up to three percent annually. Electricity in Armenia is generated primarily by the Armenian Nuclear Power Plant (ANPP), hydroelectric plants, and thermal plants.

Which country imports natural gas to Armenia?

Natural gas is imported primarily from Russia through Georgia, with a limited volume of natural gas imported from Iran in an electricity-for-gas swap arrangement. Nuclear fuel is imported from Russia. Armenia's energy consumption efficiency is low compared to developed countries.

What are the energy reforms in Armenia?

The reforms went into effect starting February 1, 2022. The principal bodies involved in energy sector governance in Armenia include the Ministry of Territorial Administration and Infrastructure (MTAI), which is responsible for overall energy policymaking; the Ministry of Environment; the PSRC; and the Committee on Nuclear Safety Regulation (ANRA).

Does Armenia have energy resources?

Armenia has limited energy resources and can meet only a fraction of the total demand for energy from domestic resources. Armenia does not have oil or natural gas reserves and is thus highly dependent on imported energy resources. It imports oil and petroleum products from Russia, Georgia, Iran, and Europe.
