Let's face it--energy storage isn't exactly dinner table conversation. But when Asuncion's shared storage model slashes electricity bills by 40% for local businesses \*cue jaw ...

Compared with the gravity storage power plant using a single giant weight, the modular-gravity energy storage (M-GES) power plant has better flexibility in operation and manufacturing. ...

Asuncion faces unique energy challenges with its tropical climate and growing industrial sector. The city's peak electricity demand reached 1,850 MW in 2023, yet renewable integration ...

Combining high-speed rotational mechanics with smart grid integration, this initiative addresses voltage fluctuations and storage gaps in solar/wind systems. Discover how flywheels ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

As Paraguay's capital pushes toward renewable energy independence, the Asuncion photovoltaic energy storage export market has become a hotbed for innovative solutions.

100 massive concrete blocks, each weighing as much as 10 adult elephants, dancing to the rhythm of Paraguay's electricity demand. This isn't a sci-fi movie plot - it's the revolutionary ...

The world's first 300-megawatt compressed air energy storage (CAES) demonstration project, 'Nengchu-1,' has achieved full capacity grid connection and begun generating power in ...
