What is the Bak 21700 datasheet?

Every battery has unique features and characteristics that directly impact its performance. The Bak 21700 datasheet provides a wealth of information about the battery's voltage, capacity, charging and discharging rates, temperature range, and overall compatibility with different devices and systems.

What is a Bak 21700 battery?

From its precise dimensions and impressive energy density to its ability to withstand extreme temperatures and deliver seamless power output, this datasheet unveils the true capabilities of the Bak 21700 battery while igniting excitement for what the future holds for energy storage technology.

What is a 21700 battery?

A 21700 battery is a high-capacity, rechargeable lithium-ion cell designed for superior energy efficiency and performance. With a standard size of 21mm in diameter and 70mm in length, these batteries were developed as a next-generation improvement over 18650 cells, offering increased power output, extended runtime, and higher energy density.

What is Bak battery n21700ch-58e?

Similar to other products in the same series, Bak Battery's N21700CH-58E battery cells adopt a high nickel + silicon anode system, enabling discharge in a wide temperature range from -20°C to +70°C. This meets the normal usage requirements in extreme environments.

Similar to other products in the same series, Bak Battery's N21700CH-58E battery cells adopt a high nickel + silicon anode system, enabling discharge in a wide temperature range from ...

Get everything you need for the lithium-ion battery cell BAK Battery N21700CG-50: Extensive measurement data in the total operation regime, a high-precision, physical battery model with ...

The BAK 21700 5000mAh 15A Battery (N21700CG) is currently in stock ...

At the onset of 2024, BAK Battery firstly launches the battle of "excessive competition", announcing the mass production of its N21700CH-58E high-capacity battery cell, ...

Similar to other products in the same series, Bak Battery's N21700CH-58E battery cells adopt a high nickel + silicon anode system, enabling ...

BAK 21700 battery cell

1C Cycle Life (100% DOD 25°C) 800 Cycles > 80% (RT 0.5C/1C) Operating Temperature Range (Cell Surface) charge : 0~55°C Discharge : -20~70°C

Recently, BAK Battery announced the mass production of its 21700-5.5Ah high-capacity battery cells, once again achieving a ...

The BAK 21700 5000mAh 15A Battery (N21700CG) is currently in stock and available at 18650 battery store. Bulk discounts are available. All items ship from our Atlanta, GA warehouse for ...
