Kuwait is working on a battery storage project with a discharge capacity of up to 1.5 gigawatts and total energy storage of 4GWh to 6GWh, in a bid to ease chronic power ...

A sodium-ion battery (NIB, SIB, or Na-ion battery) is a rechargeable battery that uses sodium ions (Na +) as charge carriers. In some cases, its working principle and cell construction are similar ...

The EV battery giant said its sodium-ion batteries will be used for battery swapping, passenger vehicles, commercial vehicles, and energy storage. CATL Choco-Swap EV battery ...

Among them, secondary batteries like lithium batteries, sodium batteries, and lead-acid batteries have received wide attention in recent years. Lithium-ion batteries (LIBs) ...

For years, lithium-ion batteries have been the go-to choice for energy storage in these critical sites. But now, a new contender is stepping onto the field: sodium battery ...

On November 11, 2025, Kuwait's Ministry of Electricity, Water, and Renewable Energy (MEWRE) announced a landmark BESS project with planned discharge capacity of 1 to 1.5 gigawatts and ...

At Kurt.energy, a division of Altreonic, safety has always been one of our main concerns when selecting battery cells. It is a pleasure to announce we now offer leading-edge ...

Global leaders like BYD, Tesla, LG Chem, Panasonic, and Samsung SDI are bringing cutting-edge lithium iron phosphate (LiFePO₄) ...
