As we approach Q4 2025, watch for Belgrade's first virtual power plant aggregating 5,000 residential storage units--a game-changer for grid flexibility during winter peaks.

Turkish renewable power developer Fortis Energy has acquired a 180MWac solar project in Serbia, with plans to add a battery energy storage system (BESS) to the facility.

"Our system is a fully integrated battery energy storage and power delivery solution. We've developed a unique inverter architecture and fully incorporated the power ...

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another ...

Mid last year, the government embarked on a lookout for strategic partners who would install the facilities, including 1,000 MWac ...

As the renewable energy fluctuating in the power grid, the traditional coal-fired power plant needs to operate on the extremely low load, so as to increase the share of renewable energy.

Serbia's leap into energy storage isn't just about storing electrons--it's about rewriting the rules of Balkan energy politics. With renewable energy projects sprouting like ...
