Using his lab's black metal technology, the new design produces a STEG device that is 15 times more efficient than earlier ...

The team has developed solar thermoelectric generators (STEGs) featuring black metal technology that boasts an impressive 15 ...

His lab's innovative black metal technology design helps create a STEG device 15 times more efficient than previous devices, ...

His lab's innovative black metal technology design helps create a STEG device 15 times more efficient than previous devices, paving the way for new renewable energy ...

Using his lab's black metal technology, the new design produces a STEG device that is 15 times more efficient than earlier models, opening the door to new possibilities in ...

Discover how black metal technology and better heat management can create a solar thermoelectric generator 15 times more efficient than current devices.

This compact, lightweight generator could power weather sensors, smart devices and even off-grid systems in remote areas. Guo's black metal isn't just for small devices; it ...

A Rochester team engineered a new type of solar thermoelectric generator that produces 15 times more power than earlier versions.
