This development builds on Sumitomo Electric's decades ...

The Jimusaer Vanadium Flow Battery is the first storage project in the world to reach the gigawatt-hour scale using this chemistry, a milestone that shifts vanadium systems from niche ...

Phase 1 of the Yongren vanadium flow battery (VFB) energy storage project has been successfully completed and connected to the grid on 31 December 2025, marking a ...

The project is also one of the world's largest vanadium flow battery energy storage projects to date. The project provides a total installed capacity of 200 MW / 1,000 MWh, ...

The long-duration energy storage project - backed by a A\$150-million state funding commitment - aims to deliver a locally manufactured 500 MWh vanadium flow battery ...

This development builds on Sumitomo Electric's decades of expertise in vanadium redox flow battery (VRFB) technology, reinforcing its leadership in sustainable energy storage ...

The combination of vanadium flow batteries with on-site renewable generation at this project will ensure continuous clean energy is available, day or night, promote tribal energy autonomy and ...

Western Australia begins a two-stage EOI for a Vanadium BESS in Kalgoorlie to improve grid stability and promote clean energy.
