Our 233/250/400kWh Liquid-Cooled Outdoor Cabinet Energy Storage System integrates an advanced energy management system that monitors battery status in real-time and optimizes ...

Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to ...

Liquid Cooling Technology offers a far more effective and precise method of thermal management. By circulating a specialized coolant through channels integrated within or ...

This advanced all-in-one solution seamlessly integrates five high-capacity 314Ah battery modules, paired with state-of-the-art liquid cooling technology, ensuring exceptional thermal stability ...

Explore the evolution and applications of liquid-cooled battery storage units, enhancing energy efficiency and reliability.

Integrated storage solution with an innovative cooling system. The cell-to-pack solution, also known as CTP, combines the liquid-cooled battery system with a temperature spread

During rapid charging from solar panels on a sunny day or heavy discharge to power a home or business, battery cells naturally generate a significant amount of heat.

In liquid-cooled cabinets, batteries are packed more densely and operate at higher power levels. Under these conditions, even small inconsistencies may amplify local ...
