What is a 4000A switchboard?

A 4000A switchboard is a type of switchboard commonly used in various industries for low and medium voltage applications. All main switchboard components within 4000A switchboards, including busbars, circuit breakers, and switchgear, are coordinated to work together effectively and safely to distribute power throughout the system.

Where does SPS manufacture switchgear & electrical power distribution equipment?

At SPS we manufacture custom switchgear and electrical power distribution equipment for customers across the globe from our state-of-the-art headquarters in Winneconne, Wisconsin USA.

What type of switchgear is available?

Our metal-enclosed switchgear is available from 5kV-38kV, with flexible build/component options, the ability to add on to existing switchgear. Ideal when underground distribution systems must be sectionalized with protected taps. SPS fuse gear available through 35kV in single and three phase configurations, for loop feed and radial circuits.
