Can China close Africa's energy gap?

China's solar industry is keen to close Africa's energy gap, providing sustainable energy to the millions that don't have access. For instance, at this year's Forum on China-Africa Cooperation gathering, China is expected to advance its Africa Solar Belt Programme.

How much money did China invest in Africa in 2022?

Based on a Chinese government report from its "Belt and Road Initiative," in 2022, China made an additional direct investment of USD 3.4 billion in Africa. By the end of 2022, China had established more than 3,300 overseas enterprises in Africa, with a total direct investment exceeding USD 40 billion.

Is China abandoning African interests?

China has been criticised for abandoning African interests by adding value in China and not in Africa. Many people and industries on the African continent lack access to reliable and affordable energy - and local industry is keen to capture that market.

How have China-Africa relations changed over the past two years?

China-Africa relations have deepened over the past two decades, characterised by increased economic cooperation, investment and infrastructure development. China is now Africa's largest trading partner, with partnerships focused on building roads, railways and energy projects.
