---

Performing UE tests between communications systems (handover tests) usually requires set-up of several measuring instruments and creation of complex scenarios. SmartStudio eliminates ...

Comprehensive 5G and 4G base station performance validation with Simnovus" UE-ORU simulator.

Anritsu's Signaling Testers, also known as base station simulators, support a wide range of communication standards including 2G, 3G, 4G (LTE/LTE-A/LTE-A Pro) and 5G.

The base station simulator is capable of analyzing and generating LTE (LTE-M, NB-IoT) and NR (5G) signals for testing subscriber terminals of cellular ...

End-to-End 4G LTE Communications Network Lab (CNL) with all components such as eNodeB, MME, Serving Gateway, PDN Gateway, HSS, SGSN, PCRF, PCEF, AF and others to simulate ...

Whether you're validating network infrastructure, testing RF performance, or analyzing signal quality, we provide industry-leading tools including spectrum analyzers, protocol analyzers, ...

The Signalling Tester MD8475B is an all-in-one, high-performance base station simulator supporting various mobile communications technologies ranging from 2G to LTE-Advanced.

Conclusion: 4G testing is a multifaceted process that covers various technical aspects to ensure a robust and reliable wireless communication infrastructure. It involves a ...
