Which companies provide utilities services in the Cook Islands?

The companies delivering utilities services in the Cook Islands are: Te Aponga Uira, To Tatou Vai, and Te Mana Uira o Araura. In each case, these companies are the only providers of the services in their market. Economics tells us that where there is a single provider the level of service is not what consumers want for the prices they pay.

Why is regulation important in the Cook Islands?

Regulation can provide independent oversight of customer service, quality of supply and the fairness of prices. The companies delivering utilities services in the Cook Islands are: Te Aponga Uira, To Tatou Vai, and Te Mana Uira o Araura. In each case, these companies are the only providers of the services in their market.

How much electricity does the Cook Islands use per capita?

Per-capita electricity consumption is approximately two-thirds that in the European Union. Greenhouse gas emissions total 88,810 t per year, or 10.36 t per capita. Electricity in the Cook Islands was historically produced by diesel generators on each island.

How was electricity produced in the Cook Islands?

Electricity in the Cook Islands was historically produced by diesel generators on each island. Fuel was imported from Auckland and required long sea voyages to get to the northern atolls, resulting in high costs and occasional supply disruptions.
