Could solar energy be a key to Croatia's energy future?

"Croatia has vast untapped solar potential. By modernising grid infrastructure, supporting energy storage solutions and remove barriers such as the high grid connection costs, we can bring solar energy to the forefront of Croatia's energy future."

Why is Solarpower Europe partnering with Res Croatia?

SolarPower Europe's partnership with RES Croatia underscores our dedication to supporting Croatia and its neighbours overcome barriers to renewable energy growth, including high grid connection costs and the need for an updated grid infrastructure to support solar projects.

Can Croatia become a regional leader in battery energy storage?

The participants agreed that Croatia has the potential to become a regional leader in the integration of renewable sources and battery energy storage, but this requires a rapid modernization of the transmission and distribution network, as well as legislative adjustments.

What does Croatia's solar partnership mean for the region?

As Croatia approaches the milestone of 1GW of solar capacity, this partnership reflects a shared commitment to supporting the region's renewable energy ambitions and helping Croatia unlock its significant solar potential.

This study analyzes the record electricity consumption in Croatia during the July 2024 heatwave and evaluates how the increased deployment of onshore wind and solar ...

Both projects, located in the southern Dalmatian region near Split, mark the beginning of DRI's ambition to establish up to 500 MW of wind and solar capacity in Croatia by ...

This will significantly enhance the flexibility of Croatia's power grid and enable the integration of a greater share of intermittent ...

Hybrid solutions - such pumped storage power plants combined with wind and/or solar farms - are becoming increasingly important for the generation and storage of clean, renewable energy, ...

It was concluded that system flexibility and battery storage are essential components of the green transition and key to ensuring a stable and secure energy supply in ...

Croatia wind solar and storage integration

Both projects, located in the southern Dalmatian region near Split, mark the beginning of DRI's ambition to establish up to 500 MW of ...

Once operational, the BESS and VPP systems will provide Croatia's power grid with greater flexibility, allowing for a higher share of intermittent renewable energy sources, ...

With an ambitious roadmap, RES Croatia has been a key player in promoting renewables in Croatia since 2016, representing a range of technologies from solar and wind to ...
