How does Telecom Argentina use 5G technology?

Some use 5G technology through network slicing on its recently deployed 5G core in Argentina's capital Buenos Aires. Alongside connectivity, Telecom Argentina also plans to expand its data center footprint to support AI workloads and corporate clients.

How many 5G networks are there in Buenos Aires?

Local press reports stated that the carrier has already rolled out about 25 private networks across mining, oil, ports, and agriculture. Some use 5G technology through network slicing on its recently deployed 5G core in Argentina's capital Buenos Aires.

How will 5G impact Buenos Aires?

5G rollout gains speed - Telecom operates 550 5G sites, targeting 750 by year-end, while also introducing private 5G through network slicing on its new Buenos Aires core. Data center upgrades planned - All 16 of Telecom's facilities will be expanded to 10MW capacity to serve AI and enterprise demand, with Pacheco as the flagship hub.

How many 5G sites will Telecom Argentina have in 2025?

Telecom Argentina expects to close 2025 with at least 750 active 5G sites, up from its current 550, as the company accelerates network deployment and begins offering private 5G solutions. Local press reports stated that the carrier has already rolled out about 25 private networks across mining, oil, ports, and agriculture.
