Which Chinese companies are establishing a 5G network in Nicaragua?

Chinese firms, including Xinwei, are established in Nicaragua's digital sector. China-based Huawei is currently collaborating with the Ortega government to eventually build a 5G network in the country. Strategic Considerations China's footprint in Nicaragua is expanding beyond commercial matters.

What is TELCOR doing to implement 5G technology in Nicaragua?

TELCOR is initiating the process of planning and defining a national strategy and roadmap for implementing 5G technology in Nicaragua. Authorizations for new assignments, modifications, or changes in the right to use the 3300-3400 MHz, 3400-3600 MHz, and 3600-3700 MHz frequency bands have temporarily been suspended.

Can China build a housing project in Nicaragua?

China's advance into Nicaraguan infrastructure projects began with a housing project done by a China-based company with Chinese workers, but paid for by the Nicaraguan government. The \$60 million project involves construction of 12,000 low-income housing units in 85 municipalities across the country, with work beginning in April 2023.

Does China have a strategic position in Nicaragua?

The October 2023 announcement of multiple major infrastructure projects to be performed by Chinese companies in Nicaragua highlights China's deepening strategic position in that country, with significant implications for the United States and the region.

However, for this to happen, the region will require critical digital infrastructure to facilitate the adoption of 5G. To achieve this, Central American countries must work on ...
