How long does a generator last?

No system is built to last forever. Knowing when to schedule a repair and when it makes more sense to replace is how you avoid being caught off guard when the next storm rolls through. Not every generator ages the same way. A few key things make the difference between one that lasts 15 years and one that wears out much sooner. Fuel type.

Can a generator outlive its average lifespan?

Handled right, a generator can outlive its average lifespan. Neglect it, and you could be shopping for a replacement years earlier than you planned. Generators usually tell you when something is wrong. It is not always obvious, but the signs are there. Watch for: In Florida, repairs are worth acting on quickly.

What is the difference between a standby generator and a portable generator?

Standby generators, designed for continuous use, often have longer lifespans than portable generators. Standby generators can last 20,000 to 30,000 hours or more with proper maintenance, while portable generators typically last 1,000 to 2,000 hours. Explore the dynamic world of generators with our expert authors at Generator Flow.

How long does a generator last in Florida?

Most fall somewhere between 10 and 15 years. That number changes depending on how often the generator runs and how well it is maintained. In Florida, consistent maintenance makes the biggest difference. Can I extend my generator's life? Yes. Routine service, oil changes, and inspections are essential.
