We'll kick things off by stating that gensets, or generator sets, are a crucial component in the reefer container industry. These ...

A commercial generator for your 20ft or 40ft refrigerated shipping container will give you the protection and peace of mind you need. But how do you know which one to pick? We'll ...

A genset (generator set) is an external generator that powers the refrigeration unit of a reefer container. Gensets are typically used in situations when reefer containers are stored or ...

A Genset attached to a reefer container powers the refrigeration unit. This makes sure that the container's contents stay ...

When your reefer container leaves a powered port plug, it still needs electricity to keep cargo frozen or chilled. That's where a genset --short for generator set --comes in.

The Genset, also known as a Clip On Generator, is a handy unit that clips onto the chassis of a Reefer Container to provide power when an external source of power is not available, such as ...

Genset machines work by generating electricity to power the refrigeration unit within a reefer container. When a reefer container is stationary at a port or facility, it can plug ...

Carrier's industry-leading PowerLINE® Generator Sets are designed and built for continuous, unattended operation for all refrigerated containers ...
