Are solar panels paired with a home battery energy storage system?

By Sam Wigness | Dec 4, 2025 In the last year, nearly two-thirds of solar.com customers paired their solar panels with a home battery energy storage system (aka BESS). Why?

Should you invest in home battery storage?

Whether you frequently experience outages, are paying exorbitant electric bills, or simply want more energy independence, investing in home battery storage may be the solution you're looking for. You don't need a home solar panel system to reap the benefits of home battery backup.

How much does solar battery storage cost?

If you're looking to buy battery storage for your solar panels, you can probably expect to pay between \$7,000 and \$18,000. Just know that the overall price range for a solar battery is even wider, with prices anywhere from a few hundred dollars to \$30,000+, depending on what you buy, who you buy it from and how you plan to use it.

What is the best home battery storage?

Because home battery storage has something to offer everyone--from backup power to bill savings to self-reliance. With this in mind, there is no single "best" battery. There are different solutions to meet the varying requirements and needs of homeowners across the country.
