Does Africa need a regulated air conditioning industry?

Africa's demand for cooling systems is expanding. But regulating the industry is a struggle. A technician positions an R-22 refrigerant on an outdoor air conditioning unit in Lagos, Nigeria, Thursday, July 18, 2024. (AP Photo/Sunday Alamba)

Do air conditioners in Africa still use R-22 gas?

(AP Photo/Sunday Alamba) According to industry professionals and public records, the most common air conditioners in Africa still use what's known as R-22 gas. This refrigerant is less harmful to the ozone layer compared to the older, even more damaging coolants called chlorofluorocarbons (CFCs).

Why do air conditioners sprout from the walls in Abuja?

In Abuja and across Nigeria, air conditioners sprout from the walls as the appliance turns from a middle-class luxury into a necessity in an increasingly hot climate. The industry is governed by regulations prohibiting the release of cooling gases into the air, for example by conducting leak tests after an appliance is fixed.

Are commercial air conditioner manufacturers self-regulate?

Manufacturers who offer direct refrigeration and air conditioning installation services to big commercial customers have tried to self-regulate with safety training and certifications for their technicians, Ajeigbe said. People sell air conditioners on the street in Lagos, Nigeria, Monday, July 15, 2024. (AP Photo/Sunday Alamba)

Jebel 24k/2ton hybrid solar duct AC offers powerful ducted cooling for large spaces. This high-capacity unit operates on DC solar and grid power, ensuring efficient climate control across ...

Most future greenhouse gas emissions will come from China, India and Africa. Their mix of energy sources will decide the climate's ...

Jebel hybrid solar mono split AC delivers efficient wall-mounted cooling. Powered by solar ACDC tech for eco-friendly comfort across Middle East & Africa.

At present, air conditioning (AC) is the most effective means for the cooling of indoor space. However, its increased global use is ...

Adoption of Solar Cooling in East Africa. Abstract-- As the concept of sustainable development continues to be adopted in all areas to do with the wellbeing of mankind and his environment, ...

Across Africa, technology and entrepreneurship are transforming how cooling is delivered. In agriculture, startups are ...

Significant investment opportunities in the Middle East and Africa solar powered portable outdoor air conditioner market include expanding manufacturing capacities to meet ...

According to industry professionals and public records, the most common air conditioners in Africa still use what's known as R-22 gas. This refrigerant ...
