Discover the top 10 solar companies revolutionizing Africa's energy landscape. Our 2025 analysis ranks leaders by installed capacity, technological innovation, and continent-wide impact across ...

Uganda has authorized Energy America and EA Astrovolt to develop a large-scale solar and storage facility as part of its 1 GW renewable rollout.

Africa experience a surge in renewable adoption, especially with solar energy, in 2025. In this article, we highlight some of the top solar energy projects completed across the ...

The project is expected to produce enough polysilicon to manufacture 40 GW of solar modules globally, helping diversify Omani exports and catalyze the creation of a new ...

There is no production of solar modules in East Africa yet; all systems are imported. The project involves a high element of technology transfer and training and will benefit urban and rural ...

Discover the top solar projects revolutionizing East Africa, from Kenya's 40MW Isinya and Makueni farms to Uganda's 100MW battery storage plant.

EA and Enamax-Kenya will work with local governments, energy regulators and key stakeholders to facilitate major solar power project executions. The initiative will prioritise ...

In 2025, 18 African countries are expected to install at least 100 MW of new solar capacity - up from just two in 2024. This means more solar will be ...
