Which energy technologies should be included in ASEAN's Energy Outlook modelling?

Thus, the Economic Research Institute for ASEAN and East Asia has considered including commercially available energy technologies such as carbon capture, utilisation, and storage; hydrogen; and ammonia fuels into the region's energy outlook modelling. Professor Tetsuya Watanabe, President, Economic Research Institute for ASEAN and East Asia

Is transportation a major energy consumer in ASEAN?

The transportation sector in ASEAN is a major energy consumer, accounting for 33.6% of total final energy consumption (TFEC) in 2022 and projected to remain above 33% by 2030 [3,4]. Energy consumption by sectors in ASEAN, Ref: ASEAN Energy Outlook 8 (Data Source: )

Are there barriers to EV adoption in Southeast Asia?

The global transition to electric vehicles (EVs) is gaining momentum, yet adoption remains uneven, especially in developing regions such as Southeast Asia. Existing studies identify five interrelated barriers to EV adoption: economic, infrastructural, technological, policy and regulatory, and social or cultural.

What are Southeast Asia's EV aspirations?

Delina provides a comparative overview of Southeast Asia's EV aspirations, highlighting the uneven policy commitments across the region, with countries like Thailand and Singapore advancing comprehensive strategies, while others such as Myanmar and Cambodia lag behind due to infrastructural and regulatory limitations.

This report examines the Top 10 Companies leading Southeast Asia's automotive energy storage sector, featuring global technology leaders, regional manufacturers, and ...

This report was prepared by the Working Group for Analysis of Energy Saving Potential in East Asia under an energy research project conducted by the Economic Research Institute for ...

Explore the scaling up of affordable electric vehicle adoption in Asia, highlighting the \$1.3 trillion investment needed by 2030, government incentives, and innovative financing ...

As East Asia leads the global charge in renewable energy adoption, mobile storage solutions are becoming the region's secret sauce for energy resilience. From Tokyo's neon-lit streets to ...
