Estonia is launching a major 300 MW solar-plus-storage project in Ida-Viru County, transforming a former quarry to boost renewable energy and energy independence.

This sophisticated system is crucial in preventing issues such as overcharging and short circuits, which can compromise your battery's lifespan and safety. Additionally, it supports remote ...

Corsica Sole and Evecon are planning the construction of two battery storage power plants with a total capacity of 400 MWh in Estonia. They are intended to help stabilize ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW ...

The EUR100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of ...

Sunly, in collaboration with Metsagrupp, is developing a 16 MW / 32 MWh battery energy storage system (BESS) next to the 45 MW Raba Solar Park in Pärnu County, Estonia.

Construction has begun in Estonia on two energy storage facilities with a total capacity of 200 MW and 400 MWh. On Thursday, a symbolic groundbreaking ceremony took ...
