Will a new solar glass plant in North Georgia create a strong supply chain?

"SOLARCYCLE's announcement of hundreds of jobs coming to a new, cutting-edge solar glass plant in North Georgia further cements the Peach State as a national leader in domestic solar manufacturing, and they will play a pivotal role in creating a robust supply chain for the United States emerging solar footprint.

Can recycled solar panels be used to make new solar glass?

The facility will be the first-of-its-kind in the country to use recycled materials from retired solar panels to make new solar glass. "SOLARCYCLE's first-of-its-kind facility is a transformational investment for the Polk County community and will help drive its economy for years to come," said Governor Brian Kemp.

Can solar glass make c-Si photovoltaics?

SOLARCYCLE's new facility in Georgia will position the company as one of the first manufacturers of specialized glass for crystalline-silicon (c-Si) photovoltaics in the U.S., with the capacity to make five to six gigawatts worth of solar glass every year.
