Germany is developing both salt-based thermal energy storage and air-based energy storage technologies. The salt-based systems use molten salt to store heat, which can then be ...

Under the agreement announced on Wednesday, Hamburg-based Hansa Battery will develop the projects up to construction readiness and secure binding grid reservations. ...

Hamburg, 4th February 2025 - Hamburg-based solar and storage specialist greentech was recently able to obtain the first planning decisions for two ...

Germany's grid-scale battery buildout is accelerating. Installed capacity hit 2 GW last quarter - and could reach 3 GW before the end of 2025. Growth remains slower than in more mature ...

A successful energy transition will require a variety of storage systems to absorb electricity during peak times and release it when needed -- for example in the evening and at night.

Hamburg, 4th February 2025 - Hamburg-based solar and storage specialist greentech was recently able to obtain the first planning decisions for two 20 MW battery storage systems ...

Driverless container transporters operating in the port of Hamburg, Germany, at the HHLA Container Terminal Altenwerder, are being run on lithium-ion batteries instead of diesel.

ju:niz Energy GmbH, an EQT portfolio company based in Aschheim/Germany, develops and operates large-scale battery storage systems in accordance with the latest ...
