What is Bess & why is it important in Vietnam?

BESS emerges as a critical enabler in Vietnam 's transition towards a future of energy efficiency, security, and sustainability. By storing surplus energy during low-demand hours and utilising it in times of high demand, BESS eliminates power shortages and blackouts, thus enhancing the reliability of the grid and reducing electricity costs.

What is a Bess project?

This Project involves Marubeni installing and operating the BESS at a resort facility owned by a Vingroup subsidiary, using a system developed and manufactured by VinFast Auto Ltd. (hereinafter, "VinFast") under the VinFast Energy brand, another Vingroup relevant subsidiary.

How much does it cost to build a Bess cell plant?

The cell plant in Vung Anh Economic Zone, Ha Tinh, will supply components for both EV and BESS applications. Its planned annual production capacity is 5GWh and its investment cost was given at around US\$275 million as construction began in November 2022.

What is a Bess business model?

This business model, which uses third-party investment in the BESS of this scale to reduce electricity costs, is one of the first of its kind in Vietnam. Marubeni aims to extend its BESS business by evaluating the economic viability of this service.

Up-to-date list of battery energy storage systems (BESS) vendors. Get electrified!

In a significant development, Vietnam Electricity (EVN) has secured approval for its first pilot BESS project with a capacity of 50 MW/50MWh.
