Is 5G being tested in Nepal?

Nepal Telecom has begun testing the 5G service on the occasion of its 19th anniversary.

How many 5G operators are there in Nepal?

By February 2022, there were 427 operators in 137 countries/regions with 5G (GSA). People here have also started to demand 5G service here in Nepal. With the initiation of such demand, we are going to discuss everything about 5G network in Nepal now after Ntc, one of the operators has already started the trial.

Should Nepal follow the 5G spectrum band?

As for Ntc, the 2.6 GHz band is to be used for the trial only and there is no confirmation on which airwaves it will get for commercial service. Considering the device ecosystem and our small market, Nepal should always follow the 5G spectrum band which is ubiquitously available. Are we at a 5G demanding state?

Which phones have 5G support in Nepal?

Xiaomi launched Mi 10: the first 5G smartphone in Nepal and then all of the latest flagship series including Xiaomi 11, and 12 have 5G support. Similarly, other flagship phone makers such as Apple, Samsung, and OnePlus also have 5G support. This should help the telcos to test 5G on this device when they will bring their phones to Nepal.

If 5G trials are successful, Nepal can expect a partial rollout in 2025-2026, starting in major cities like Kathmandu, Pokhara, and Lalitpur.
