How much does a solar system cost?

On average, residential solar installations range from \$24,000-\$36,000 after applying federal tax credits. A 15,900 kilowatt-hour (kWh) system of 18-34 panels for a standard three-bedroom home costs an average of \$24,222, according to our survey. However, solar costs can vary widely depending on where you live.

How much do solar panels cost in New York?

As of 2024, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt.

How much does a monocrystalline solar system cost?

They're typically used in large-scale or specialty applications. For example, a 6 kilowatt (kW) monocrystalline system may cost around \$1,000-\$2,000 more than a polycrystalline system but could generate more power in a smaller footprint.

How much does solar panel installation cost?

Solar panel installation costs depend on your home's size, energy needs, roof structure, and location. You can estimate around \$10 to \$15 per square foot of living space for solar panel installation. Keep in mind, this estimate doesn't account for tax credits or local incentives, which can significantly reduce your final cost.
