How much does a home solar system cost?

According to studies by the U.S. Department of Energy,the all-in cost of a home solar panel system is between $2.74 to $3.30 per watt. 1,2,12 This figure includes the solar panels,the installation,and other expenses. Using these numbers,an average-sized 8-kilowatt residential solar system would cost between $21,900 - $26,400.

How much do solar panels cost?

The price of solar panels changes depending on where you live,but the average for installation is just under $29,000 or $2.75 per watt. On the high end,we talked to a solar customer in Hawaii who spent $100,000 going solar. Dion in Nevada said their 10-kW system cost about $20,000,which is about the national average price for a 7-kW system.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally,installing solar panels on businesses costs a bit less per watt because the systems are larger,but the total costs will be higher. In 2025,the average cost for commercial solar panels is just about $2.00 per watt.

Why do solar panels cost so much?

The size of your solar power system, measured in kilowatts (kW), is the most important factor affecting solar panel prices. Naturally, larger systems cost more than smaller ones, but they usually offer a lower cost per watt. Solar panels typically account for 12 - 18% of the total installation cost.
