How much does a solar roof tile system cost?

To give you an idea, the average 3.5 kW solar roof tile system will cost around €13,000, compared to approximately €7,000 for a regular PV system. However, remember that you are also getting a new roof with your solar tiles, so a direct price comparison is slightly misleading. Information last updated in April 2025.

How much money does Solarstone have?

It recently secured EUR10 million in funds to expand sales across Europe. Estonian startup Solarstone announced it has recently secured EUR10 million (\$10.1 million) in its second financing round. "With these funds, Solarstone intends to expand building integrated solar PV solutions across Europe and beyond," the company said in a statement released.

Why are roof tiles so expensive?

Roof tiles are expensive because you are ultimately installing a new roof, and while they look great, they can be less efficient than solar panels. As we've mentioned, solar tiles tend to range between 10% and 20%, although some models approach the best solar panels, topping at around 23%.

How efficient are solar tiles?

Solar tiles typically have an efficiency rating of around 10%-23%, making them, on average, less efficient than typical solar panels, which are 18%-25% efficient. There are cases where solar tiles are much more efficient than panels.
