How much does a solar panel installation cost?

One of the biggest cost factors for your solar panel installation is the size of the system you have installed. System size is measured in kilowatts (kW) and is determined by household energy consumption. The average cost per watt is \$3.04, but larger systems often have a lower cost per watt.

How much do solar panels cost in New York?

As of 2024, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt.

How much does a solar system cost?

This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations typically have a lower cost per watt because the panels can be purchased at a 'bulk price.'

Are solar panels tax deductible in New York?

Lowers your solar panel system's cost by 30%, but expires on January 1, 2026. You don't need to pay any sales tax on new solar panel systems in New York, saving at least 4% of your system costs. If you use solar energy as a source of power, for 15 years you won't need to pay a tax on the value your solar panels add to your property.
