What is a 500 farad capacitor used for?

One of the largest capacitors available on the market today: at 500 Farads, they don't get much bigger than this. Use it for a wide variety of electrostatic or storage experiments, or to produce sparks in a laboratory or classroom setting. Features: CAUTION: Only to be used by scientists and experienced electronics teachers.

What is a microfarad capacitor?

The microfarad (MFD or μF) rating signifies the capacitance of the component, a measure of its ability to store an electrical charge. Higher MFD ratings generally correlate with higher prices, as they indicate a greater storage capacity. For instance, a 60 MFD capacitor will invariably cost more than a 30 MFD capacitor of similar voltage and type.

How much does a capacitor cost?

The average price of a capacitor can range from \$10 to \$400 or more, depending on its type and purpose, so stay tuned for a deeper dive into understanding the true value of capacitors. Capacitor prices exhibit a wide range, primarily influenced by the capacitor's material, capacitance, voltage rating, and intended application.

Where can I buy supercapacitors & ultracapacitor?

Please try again. Supercapacitors & Ultracapacitors are available at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for many supercapacitor and ultracapacitor manufacturers including Cornell Dubilier, Eaton, Elna, KEMET, KYOCERA AVX, Maxwell, Vishay & more.

Super Capacitor Module with Protection Board Max 16.2V 1.67F Working Voltage 12V, 6/Set 2.7V 10F Series, Ultracapacitor, High Energy Farad Capacitor for DC-Link, Backup Power

If you have a super-cap project that needs up to 700 Farads of capacitance, check it out. Like most super-caps it has a 2.5V-max rated voltage, and remember that unlike a voltage-output ...

Its high energy and power output can meet all kinds of power needs, and its long-life charge/discharge cycle does not require frequent replacement, saving your maintenance cost.

The cost of a capacitor can range from a few cents for basic ceramic types used in low-power electronics, to several hundred dollars for specialized high-voltage or high ...

Mouser offers inventory, pricing, & datasheets for Supercapacitors / Ultracapacitors.
