How do I reposition the battery access panel?

Do not force the battery plug into the connector incorrectly. Replace the battery access panel by securing it in place and reposition the bottom cover by aligning the white bar on the cover with the same type of vertical mark on the side of the ADT Base.

What happens if a base station has a monitoring plan?

With a monitoring plan, the Base Station will alert the SimpliSafe® monitoring center who will request emergency dispatch if there's trouble. *When subscribed to a professional monitoring plan

How do I install a battery monitor?

Choose the location for mounting the device. Use a Phillips head screwdriver to screw the DIN rail clip onto the back panel of the Battery Monitor. Mount the Battery Monitor on the DIN rail at an upward angle then push down and in to clip to the rail. Connect the wiring and cables. See "Electrical Wiring" on page 2-11 for details.

How do I access my battery monitor data logs?

The data logs are available in a spreadsheet comma separated values (.csv) format. Plug the Mini-USB to USB cable directly from the Battery Monitor's Mini-USB port directly to the computer's USB port. Use "My Computer" or equivalent function to browse for a new drive called "Logs" as indicated below.
