This manual contains important information about the installation and operation of your wind and solar charge controller. Please read this manual carefully before installing and using the product.

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

By combining solar and wind energy, the system aims to optimize power generation and distribution, ensuring a stable and sustainable energy supply for the community.

Highjoule's HJ-SG Series Solar Container was built for one purpose: keeping base stations running where there's no grid power. It integrates solar PV, battery storage, backup ...

Highjoule base station systems support grid-connected, off-grid, and hybrid configurations, including integration with solar panels or wind turbines for sustainable, self-sufficient operation.

What Is a Hybrid Solar System? A hybrid solar system is a combination of a traditional solar PV system and a battery storage solution that is connected to the grid. It ...

The HJ-SG-R01 series communication container station is an advanced energy storage solution. It combines multiple energy sources to ...

Wind and Solar Hybrid System Controller -- Learn how to design, install, and optimize a system that combines renewable energy sources into one efficient powerhouse.
