Managed by Utilitas, Latvia's largest wind energy producer, this project combines wind energy generation with advanced storage capabilities, setting a new standard for ...

With increasing demand from enterprises to reduce electricity costs and carbon emissions, Huawei launched the upgraded 1+3 C& I Smart PV Solution 2.0 to offer customers new PV ...

To mark the growing importance of energy storage, Energy-Storage.news, its sister website PV Tech and Huawei have teamed up on ...

As we approach Q4 2025, Riga's storage capacity is projected to triple, potentially eliminating the need for one natural gas peaker plant entirely. Now that's what we call powering progress!

The emergence of Huawei's 600kW liquid-cooled supercharging pile is bound to accelerate the technological development and widespread application of high-power liquid ...

The world's first batch of grid-forming energy storage plants has passed grid-connection tests in China, a crucial step in integrating ...

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been ...

The initial cost of liquid-cooled supercharging piles is high, and the problem of insufficient power grid capacity and grid load adjustment is ...
