Will India become a major 5G country in 2025?

India is rising to become a major 5G nation and a growth driver for the global telecom market in 2025. India, as the world's most populous country with a population of over 1.4 billion, has enormous growth potential in the network communications market.

What are India's 5G trends?

Mobile-First Trends: With 82% of India's internet access via mobile devices, the region exemplifies the link between smartphone dependency and 5G infrastructure demand. Government policies, such as India's 2030 5G roadmap, and global urbanization trends will continue to drive investments in base station equipment.

How big is the 5G base station equipment market?

The 5G base station equipment market is estimated to reach US\$52.733 billion by 2030 from US\$29.865 billion in 2025, growing at a CAGR of 12.04%. 5G base stations form the backbone of next-generation wireless networks, enabling enhanced bandwidth, ultra-low latency, and broader coverage to support rising connectivity demands.

How has the 5G era changed India's telecommunications market?

However, the arrival of the 5G era has gradually changed the landscape of India's telecommunications market. For example, competition in the telecom carrier market has returned to normal, and the average revenue per user (ARPU) has gradually increased.

This report provides a comprehensive analysis of the power supply market for base stations, segmented by application (4G and 5G base stations) and type (All-in-One and ...

India's 5G sector is projected to contribute \$455 billion to its economy by 2024. **Mobile-First Trends:** With 82% of India's internet access via mobile devices, the region ...

With 5G base stations consuming up to 3-4 times more power than 4G systems due to higher frequency bands and denser network architectures, operators face surging electricity ...

The ongoing transition to 5G is expected to significantly influence market dynamics, creating demand for higher-power, more efficient power supplies. The competition ...

India's telecom 2025 shifted toward monetisation, with rising tariffs, uneven service quality despite

India s 5G base station power supply price reduction to 2025
