What is an energy storage cabinet?

ENERGY STORAGE SYSTEM CABINET. A cabinet containing components of the energy storage system that is included in the UL 9540 listing for the system. Personnel are not able to enter the enclosure other than reaching in to access components for maintenance purposes.

Do I need a permit for a commercial energy storage system?

Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the "City of Covina - Residential Submittal" checklist. Solar PV systems will be on a separate SPV permit. *NOTE: that LA County Fire review and approval is required prior to permit issuance.

Do I need planning clearance for a commercial energy storage system?

Planning clearance is required prior to submission to Building Application for permit. Commercial energy storage systems must be designed by an Electrical Engineer. If a photovoltaic system is also part of the installation, please refer to the "City of Covina - Residential Submittal" checklist.

How far apart should energy storage units be from each other?

The Fire Code requires that: " Individual [energy storage system] units shall be separated from each other by at least 3 feet(914 mm) of spacing" (§167;1207.11.2.1).

An FAQ overview of US installation codes and standard requirements for ESS, including the 2026 edition of NFPA 855 and updates to UL 9540A.
