Is Kazakhstan a good place to invest in solar power?

Kazakhstan has remarkable solar potential with a very well-designed auction system, a clear renewable capacity addition schedule, and a solid decarbonisation target. The country is now also including storage systems as part of its public procurement strategy in a move that will ease further integration of renewables into the grid.

How big is solar capacity in Kazakhstan?

Back in 2015, Astana was predicting installed solar capacity by the end of 2020 to reach 714 MW. A government report last month said solar capacity had reached 467 MW. Indeed, renewables are still small fry in Kazakhstan. Today solar accounts for 56 percent of the country's total renewable capacity.

What is Kazakhstan's largest solar project?

Kazakhstan's largest solar project - a 100 MW field in Saran, Karaganda Province - was opened last year by a German company, also with EBRD backing. Russian engineers doubled capacity at the EBRD-backed Burnoye plant in Zhambyl in 2018.

Can solar power drive Kazakhstan's decarbonisation?

The focus now is on leveraging solar's comparative advantages to drive forward Kazakhstan's decarbonisation and harness its significant solar resources. This report builds on the first edition of solar investment opportunities in Kazakhstan.

The global solar storage container market is experiencing explosive growth, with demand increasing by over 200% in the past two years. Pre-fabricated containerized solutions now ...

This paper presents a scenario based assessment of energy storage systems (ESS) as a flexibility resource for Kazakhstan, using an open, replicable modeling workflow in PyPSA.

In the heart of Central Asia, Kazakhstan is emerging as a key player in the global energy transition, leveraging its vast landscapes and abundant resources to pioneer ...

This article delves into the progress made in Kazakhstan's renewable energy landscape, focusing on generation capacity, legislative changes, and ongoing efforts to ...

The Draft Law proposes the introduction of the concept of an energy storage system operator to clearly define a specialised market participant responsible for the ...
