How much do solar panels cost?

Solar system prices vary, depending on the type of solar panels, manufacturer, cell size and wattage output. Our solar panels cost between \$300 to \$400 per panel, which is a competitive price considering the brands' top-tier quality and high standards. Some solar panels can run as high as \$600.

Are solar panels sold separately?

\*Solar panels are not sold separately. Grid tie inverters convert DC to AC power - which is the type of electricity used in homes. They also provide net metering capability. Batteries can store excess energy when rates are low and use it during peak hours, optimizing cost savings.

How much power does a solar panel produce per square foot?

The more efficient a solar panel is, the more power per square foot. As of 2025, the most popular solar panels have a rated output of 450 watts. To get the most out of your solar energy system, choose panels with at least that much power output. Your solar inverter setup is also an important consideration--make sure it suits your roof's layout.

Are solar panels expensive?

Solar panel systems are expensive, but there are ways to finance your investment and reduce upfront costs. Cash purchase: You pay for your system outright, which typically provides the best long-term savings.
