As of the time of writing, KSRSS is the choice mod to provide a realistic Solar System, scaled to the proportions of the Kerbin system. That means you can reasonably use ...

Solar systems Currently, KSP2 has a single solar system, the Kerbol System. At least two other systems are planned to be added to the game in future updates.

This mod adds the real solar system to its kerbal space program, where its orbits, sizes, actual textures (in 4K), real antenna sites and most real launch sites are added.

As of the time of writing, KSRSS is the choice mod to provide a realistic Solar System, scaled to the proportions of the Kerbin system. ...

This mod aims to transform the Kerbol System into the real solar system which we live in and conduct realistic space exploration. The orbits are accurately tuned to resemble the ...

Real Solar System Bundler "Real Solar System" (RSS) is a mod for Kerbal Space Program (KSP) that changes the default solar system to mimic the "real" Solar System.

This mod aims to transform the Kerbol System into the real solar system which we live in and conduct realistic space exploration. The ...
