The Victorian government has given the green light to what it says will be the state's biggest big battery, at least for now - a 350 megawatt (MW), two hour energy storage ...

NEWS: A massive new \$450 million Tesla Megapack battery energy storage system is now operational in Victoria, Australia. It's the biggest completed battery project on ...

The \$350 million (USD 224.4 million) project, being developed near the town of Little River about 45 kilometres southwest of Melbourne, will be one of the state's largest ...

The firm capacity delivered by Victoria's energy storage targets will provide reliable, affordable and clean energy as Victoria's ageing and increasingly unreliable coal ...

The Rangebank storage system will help support grid stability and is expected to have the storage capacity to power the equivalent of 80,000 homes across Victoria for one ...

The Rangebank storage system will help support grid stability and is expected to have the storage capacity to power the equivalent of ...

Through its subsidiary Energy Infrastructure Australia (EIA), Equis is currently developing one of Australia's largest battery energy storage system platforms, with 17 battery ...

The Victorian Big Battery is a grid-connected battery energy storage system (BESS) facility adjacent to the Moorabool Terminal Station (substation) near Geelong in Victoria, Australia and is owned by HMC Capital. The battery provides 450 MWh of storage and can discharge at 300 MW. It surpasses the 250 MWh Gateway Energy Storage in California, United States. When it was commissioned in December 2021, the project was the largest lithium-ion battery in the Souther...
