Could a EUR1 billion lithium project be France's largest mining project?

A EUR1 billion lithium project due to become France's largest mining operation in decades is provoking heated local debate. Five months of public discussions in Allier - a former industrial heartland in the Auvergne-Rhône-Alpes region - show the local population's divide over the plan.

Will a Gigafactory for lithium-ion batteries in France create jobs?

A gigafactory for lithium-ion batteries in France will create jobs and boost the European battery industry to drive cleaner mobility. Anastasia Walch-Guinebert has always enjoyed solving problems and figuring out ways to improve things. She also found the continuous innovation in the field of energy transition fascinating.

How many EVs can a lithium project power?

The project in Beauvoir, central France, where lithium was first detected in the 1960s, hopes to produce enough lithium per year, over 25 years, to power 700,000 EVs. Production is due to start in 2028, with the project currently undergoing a public consultation. Other miners are focused on extracting lithium from underground geothermal brines.

Where can lithium be extracted from underground geothermal brines?

Other miners are focused on extracting lithium from underground geothermal brines. French mining company Eramet, which has operations in Indonesia, Gabon and Argentina, is developing the Ageli geothermal lithium project in collaboration with Électricité de Strasbourg in a slice of Alsace well-known for lithium and geothermal reserves.

The EMILI project in Beauvoir, France, has taken a major step forward following the visit of Minister of Industry and Energy Marc Ferracci. Recognised as a project of major ...

France views the mine as crucial for both its ecological transition and national sovereignty. A EUR1 billion lithium project due to become France's largest mining operation in ...

ProLogium from Tawian has received approval for its gigafactory in France. Mass production of its ceramic lithium batteries will begin in 2027.

One of the country's largest lithium projects, EMILI, is being ...

In its initial phase, the factory will have a combined capacity of up to 9 Gigawatt-hours, with the ability to power 200 000 electric cars each year. Over time, the Douai site will ...

The EUR7 billion lithium-ion battery plant in Dunkirk is more than just a manufacturing facility; it represents a bold vision for European industrial sovereignty, a commitment to sustainable ...

The project is located in a region of the Rhine Valley recognised for its substantial lithium-bearing brine resources. The project uses geothermal energy to power the lithium ...

Imerys has confirmed the location of their new lithium extraction project (EMILI) conversion plant and loading station. The conversion plant will be located at La Loue, in the city of Saint-Victor, ...
