With rising temperatures and increased frequency and intensity of droughts, wetlands and riverine systems are increasingly at risk of being disrupted and altered, with structural changes in plant ...

We mean waaaay out there in our solar system - where the forecast might not be quite what you think. Let's look at the mean temperature of the Sun, and the planets in our ...

JOHANNESBURG --A prolonged heatwave that hit Madagascar in October would not have occurred without human-caused ...

The effects of global heat among populations in Africa, especially in Madagascar, has been unrecorded. Read more here.

For the first time, scientists have conducted a study linking human-induced climate change to prolonged heat waves in sub-Saharan ...

This page presents Madagascar's climate context for the current climatology, 1991-2020 and historical record from 1950-2023. Data is derived from ERA5 reanalysis products.

Observations indicate that Madagascar has experienced changes in temperature and rainfall patterns in recent decades. Rising temperatures have led to more frequent and ...

Abstract-- This paper investigates the performance of a solar air collector integrated into a hybrid heating and cooling system for buildings in tropical climates, specifically in Madagascar.
