Will Madrid become a central base for energy storage systems?

"Our strategy is very clear: to turn Madrid into our central base for energy storage systems. From there, we'll provide agile and specialized support to clients across Europe and Latin America," Gattoni explained.

Why do we need energy storage systems in Spain?

Energy storage systems in Spain are a key element in the fight against climate change, as they help us to address the challenge of the energy transition. These systems make renewable energy production more flexible; and therefore help us to guarantee its integration into the Spanish electricity system.

What makes esvolta a reliable energy storage company?

Powered By Reliability. Focused on sustainability and innovation, esVolta develops, owns, and operates reliable utility-scale energy storage assets across the entire lifecycle - delivering value for utilities, energy users, and investors. From concept to commissioning, each project reflects our commitment to reliable, scalable energy storage.

What makes esvolta unique?

Built With Purpose. Powered By Reliability. Focused on sustainability and innovation, esVolta develops, owns, and operates reliable utility-scale energy storage assets across the entire lifecycle - delivering value for utilities, energy users, and investors.

Risen Energy, one of the global leaders in the manufacturing of photovoltaic modules and energy storage solutions (BESS), is reinforcing its presence in Europe with the opening of its ...

With Intersolar Europe 2025 as a platform to highlight its evolution, Risen Energy emerges as a strategic partner in the global energy transition, combining cutting-edge storage solutions, ...

Currently, Spain is an avant-garde in energy futures. Since tariffs have been heightened by 22% in the year 2023 and EU green ...

Below, we explain which storage systems can help us achieve emission-free energy production, distribution and consumption.
