Does Majuro & Kwajalein have Internet?

In 2010, the Majuro and Kwajalein Atoll were connected to the HANTRU-1 undersea communications cable to provide high-speed bandwidth. Faster internet service was rolled out to Majuro and Ebeye on April 1, 2010. The majority of communication is under the responsibility of Marshall Islands National Telecommunications Authority. Newspapers:

What is a macro base station?

A macro base station refers to a wireless signal transmitting base station of a communication operator. A macro base station has a large coverage distance, generally 35 km, and is suitable for suburban areas with dispersed traffic. It has omnidirectional coverage and high power.

What is a micro base station?

A micro base station is mostly used in cities with a small coverage distance, generally 1-2 km, and directional coverage. A micro-micro base station is mostly used for blind spot coverage in urban hotspots. Generally, the transmission power is very small and the coverage distance is 500m or less.

How much power does a macro base station have?

The power of macro base stations is generally 4-10W, which is converted into a wireless signal ratio of 36-40dBm, plus the gain of the base station coverage antenna of 20dBi, which is 56-60dBm. If such power is irradiated on a person, no one can bear it.

In terms of form, future base stations will develop in three directions: macro base stations with higher performance and integration, micro base stations with smaller size, and ...
